

YADGREEN

Sustainability & Net-Zero Consulting

Sustainability is “meeting the needs of the present without compromising the ability of future generations to meet their own needs - United Nations Brundtland Commission, 1987.

Effective climate action needs a comprehensive sustainability and net-zero strategy. At least one fifth (21%) of the world's 2,000 largest public companies have committed to meet net zero targets (according to Forbes). Net-zero commitments and strategy are increasingly being incorporated by organisations world-wide, most of them voluntarily, but some due to compliance requirements either nationally or internationally (Like Paris Agreement, EuETS, Emission Trading Schemes in countries like Korea, Japan, regulated markets like that in California in the United States).

SUSTAINABILITY AND NET-ZERO STRATEGY

Businesses need to

- Cover for climate risk
- Comply to the increasing sustainability reporting needs across geographies.
- Manage the reputational risk.

YADGREEN

Sustainability & Net-zero Consulting

WE AT YADGREEN

have the resources, expertise,
and vision to do this just right

Yadgreen is developing a first-of-its kind one-stop sustainability portal for our clients to have sustainability related data, target setting and effective options for decarbonization.

Our team of experts work with corporates to develop systems for value optimisation, developing and implementing a sustainability- based behavioral change in the organisation.

YADGREEN

Sustainability & Net-zero Consulting

WHY YADGREEN..?

- Yadgreen Agriculture Co, part of the AARKSEE group of companies, and an ARAMCO Namaat partner, with offices in USA, Saudi Arabia, Bahrain and India, is a 4IR technology - based plantation company, specialised in developing blue carbon projects.
- We are a group of individuals committed sustainability with in-depth multidisciplinary expertise to create and develop efficient systems for not just managing resources sustainably, but to create and nurture value for corporates.
- YAGREEN has developed the first blue carbon project from the MENA region.
- Launching sustainability advisory services for corporates in the MENA region.
